

# NICHOLAS BLACK

3125 Monte Drive | Monroe, NC, 28110 | 7062018708 | nicholascblack4@gmail.com

## Summary

---

I am a full stack developer/software engineer living in Charlotte, North Carolina. I am especially interested in jobs utilizing **Python**, **Node.js**, **React**, and **SQL**.

## Education

---

### College of Charleston

Computer Science (3 years), Deferred May 2013

I have 90 plus hours of a bachelor's in CS done. I start back online at an accredited school this Spring.

## Employment History

---

### Leidos, Charlotte, North Carolina

Software Engineer, May 2019 - Present

- Design, develop, troubleshoot, and debug mission critical software source code using modern software development languages and tools, such as Java and C++
- Participate in the full software development lifecycle, working within broadly defined parameters
- Use Jira, Confluence, Nexus, Stash-Git/Subversion development operations, collaboration and source control tools
- Plan and estimate development tasks and work to improve performance metrics
- Develop maintainable code that matches specification
- Perform unit testing of code, including manipulation of data for analysis of system requirements
- Work closely with other senior engineers to develop the best technical design and approach for new product development
- Build software solutions where the solution is not always well defined but always considers the customer first

### Quaver Music, Nashville, Tennessee

Web Developer Frontend, October 2018 - May 2019

- Develop web applications with Dart and StageXL. Dart is an OOP language from Google.
